Health Services Over Festive Holidays

Smarty says GP surgeries are closed on 25 & 26 December and 1 & 2 January

The GP out-of-hours service is for urgent problems that cannot wait until your GP surgery opens. If you have an urgent problem when your GP surgery is closed, please call NHS 24 on 111

If you need to be seen, either a home visit will be arranged or you will be directed to a local primary care emergency centre (PCEC) or minor injury & illness unit (MIIU)

Please do not attend A&E with a problem that you would normally see your GP with. This will allow A&E to concentrate on patients with emergency or life threatening conditions. If your condition is life threatening or you need an emergency ambulance call 999

Repeat Medication

Please ensure that you order and collect your regular medication if required prior to the festive season. There is no need to order additional medication. The out-of-hours service is for urgent medical problems only and providing repeat medication may delay treatment of patients with an acute problem.
